

No Sew Quilted Star Ornament

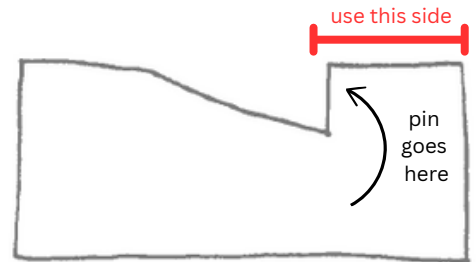

Materials Needed:

- 2.8" craft foam ball
- 10 white fabric squares, for center (2.5" x 2")
- 16 red fabric squares, for next layer (2.5" x 2")
- 16 green fabric squares, for outer layer (2.5" x 2")
- 175 silk straight pins (dressmaker pins 1 1/16")
- 10" ribbon or lace (1/2" wide)
- 1 yd. ribbon (1/8" wide)

Instructions:

Cut fabric squares with a rotary cutter. Cut out a piece of cardstock from the pattern outline here. You will use this as a guide to know where to lay your fabric.

Place 2 pins in ball to find opposite ends and center. Lay one white (center) square over pin (carefully remove pin underneath) and pin on all four corners.

Using four white (center) squares, fold 1 square in half lengthwise and put pin in wrong side of fabric and push into ball (Figure 1). Fold to center (both sides) for form a triangle and pin with 4 pins (Figure 2). Do the same opposite the first white (center) triangles, until all 4 pieces of fabric are used.

Using the cardboard guide, measure from point and this is where the next pin goes (following seams). Use 8 red (next layer) squares and go on opposite side so that fabric lays properly to create the star. Do this until all 8 pieces of red (next layer) fabric are used, folding and pinning as above (Figure 3).

Continue with 3rd row, using 8 green squares (outer layer), fold and pin.

Now do the other side of the ball, same as the beginning. Put 1/2" wide lace or ribbon around the ball where fabric ends meet and pin. Can also use hot glue or fabric glue. Tie a bow out of 1/8" ribbon and pin where lace/ribbon meets. Leave 1 large loop for hanging.
